SUMMARY

Fresh and talented information technology graduate seeking entry level engineering role to apply proficiency in JavaScript programming and testing. Dependable and self-motivated with fifteen years experience of IT experience in high pressure work environments managing multiple projects as well as self-employed and small business. Hoping to combine skills gained from recent experiences as a student and current intern at MASTERMND, along with life long customer service skills to contribute to engineering teams and provide exciting application user experiences.

EXPERIENCE

Software Intern   11/2021 - Ongoing
MASTERMND   Baltimore, MD

MASTERMND is a technical talent pipeline company aimed at filling the widening technical engineering skills gap by attacking it from every angle.

- Development basics and intermediate programming
- Automated testing using Jest
- OOP (Object-Oriented Programming)
- Server-side web programming using node.js
- CI/CD
- GIT
- Linux
- ETL process

Junior Web Developer   08/2020 - Ongoing
CODE X   Remote

CODE X is my LLC for web development and software engineering. We have done various projects for small businesses in the Baltimore area and are expanding to new areas and fields in tech.

- Supported Index software development and testing processes
- Assisted in maintenance of software for engineering applications
- Analyzed user needs and proposed design software solutions to meet them
- Supporting testing operating systems-level software and filed 150+ upgrade and bug fix reports

EDUCATION

Software Engineering/Testing   10/2021 - 04/2022
Betamore Academy

PROJECTS

💎 Crypto Parser

Programming for an application that would
 retain and display historical records of major cryptocurrencies such as Bitcoin and
 Ethereum. Learned to program using the ETL
process, CSV's and parsing. Developed with
 Javascript, node.js, and Jest.

💎 NotWordle

Programming for an application with rules
 similiar to the popular game Wordle, wherethe user is given a five-letter to blindly guess, and correctly guessed letters are displayed. Developed with Javascript, node.js, Jest

💎 BlackJack

Programming for an appliaction implementing
the rules of the casino game Blackjack using
the concept of OOP. (object-oriented
 programming). Familiarized with objects and
classes. Developed using Javascript, node.js,
 and testing using Jest.

SKILLS

Node.js · Jest · Mocha · Linux · React.js · BootStrap · npm · Responsive Design
